EXPERIENCE

Senior Android Developer

Paramount LLC | USA (Remote)

Nov 2022 – Dec 2023

- Led full-cycle development of G-Trading & Recording App from concept to launch, driving project success and enhancing user engagement.
- Innovatively implemented Picture-In-Picture mode, enhancing user experience by allowing seamless data viewing.
- Seamlessly integrated Firebase Cloud Messaging (FCM) for real-time chat functionality and push notifications, boosting 30% user engagement and interaction.
- Implemented Jetpack Compose for designs tailored to client requirements, ensuring a visually appealing and user-friendly experience, including logo design.

Senior Android Developer

Server4Sale LLC | Karachi, PK

Jul 2020 – Mar 2021

- Spearheaded the development of Ameen Janaza application catering to the US Muslim community and successfully published it on Google Play, demonstrating proficiency in app development and deployment.
- Conducted automated Unit testing to ensure the reliability and robustness of applications.
- Integrated AWS S3 storage with Retrofit, enhancing app functionality by efficiently storing and retrieving data.
- Engineered a dynamic home page that dynamically updates based on API data in real-time and Implemented version control using Git, ensuring streamlined development workflows and efficient code management.

Android Developer

Solpk Technologies | Islamabad, PK

Apr 2018 – Jan 2019

- Collaborated on two ongoing Android applications, One Minute & Home Stylist, to meet project deadlines and exceeded client expectations through diligence and initiative-taking problem-solving.
- Engineered real-time tracking functionality for riders, providing customers with live updates on their delivery status within our application, enhancing user experience and notable 25% increase in user retention.
- Spearheaded the development of three new Android applications, including Car Rental, SEM, and Abhi Laya, demonstrating leadership and technical expertise in delivering high-quality solutions that address user needs.

Jr. Android Developer

Solutions Player Ltd | Islamabad, PK

Sep 2017 – Mar 2018

- Played a pivotal role in the development of in-process applications, ensuring timely completion and successful deployment on Google Play, demonstrating a commitment to project delivery excellence.
- Utilized Firebase Crashlytics to detect and resolve critical bugs, reducing app crashes by 80% and improving app stability.
- Orchestrated the end-to-end development of six Android applications, from conceptualization to delivery, including Gilgit Bazar, PK Prize Bond, Mint Squad, Mezan Hotel, Delivery6, and Hotel Mezbani, displaying leadership and technical proficiency in delivering diverse and impactful mobile solutions.

EDUCATION

Bachelor Of Electrical Engineering

Comsats Institute of Information Technology | Islamabad, PK

Sep 2013 – Jul 2017

Campus **Bronze Medalist** having **3.62/4.0 CGPA** and developed Android Application for final year project.
